

Getting Grounded

Priority	Challenges Remaining
Create a Statewide oral health surveillance system to collect oral health data across the lifespan	<ul style="list-style-type: none">• What about private practice contribution• EM?• Mapping Medicaid providers• Expanding CNF mapping to repository• Training for examiners (calibration) training (community-based training)• Validity of data collecting• Have organizations contribute• The omission of persons with disabilities and type of disabilities; adults• Getting useful standardized data• Formatting for users• How do we sustain and transform into actionable framework• Need participation for repository to have value• Increase number of counties that participate• Metrics--> policy change based on valid data
