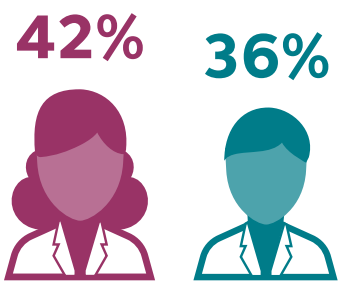
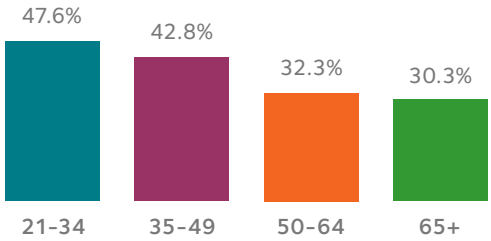
BY GENDER



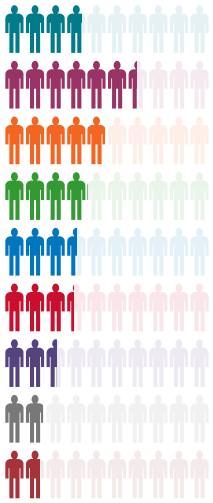
38%

OF U.S. DENTISTS participate in Medicaid for child dental services

BY AGE

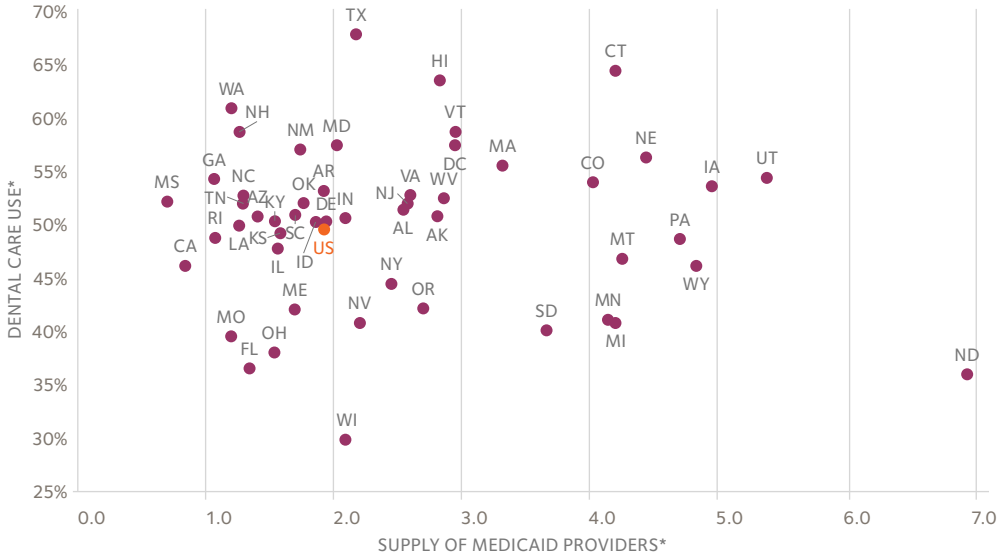


BY SPECIALTY



- GENERAL PRACTICE (37.9%)
- PEDIATRIC DENTIST (64.8%)
- ORAL SURGERY (49.4%)
- PUBLIC HEALTH (40.6%)
- ORAL PATHOLOGY (35.6%)
- ORTHODONTICS (33.9%)
- ENDODONTICS (25.5%)
- PROSTHODONTICS (18.5%)
- PERIODONTICS (17.1%)

STATES WITH SIMILAR NUMBERS OF MEDICAID PROVIDERS HAVE RADICALLY DIFFERENT DENTAL CARE USE RATES AMONG MEDICAID CHILDREN



Sources: HPI analysis of ADA masterfile database maintained by the American Dental Association, Insure Kids Now and Form 416 databases maintained by the Centers for Medicaid and Medicare services. Data are for 2015. For full methodology, please contact **hpi@ada.org**.

*Dental Care Use is the percentage of Medicaid children enrolled for 90 continuous days with a dental visit in 2015. Supply of Medicaid Providers is the ratio of the number of dentists participating in Medicaid in 2015 per 1,000 Medicaid children enrolled for 90 continuous days in 2015.

For more information, visit **ADA.org/HPI** or contact the Health Policy Institute at **hpi@ada.org.**
