

Integrating Tobacco Cessation Support Resources to Improve Patient Access

University of Texas at Austin

Tobacco Research & Evaluation

Presented by: Ashley LeMaistre, MPH

Learning Objectives:

1. Describe the Ask, Advise, Refer workflow
2. Identify benefits of integrating the eTobacco protocol into an electronic medical record
3. Summarize the process of utilizing the Quitline app

Agenda

Tobacco & Nicotine Products

Increasing Access to Tobacco Cessation: Referring to the Texas Quitline

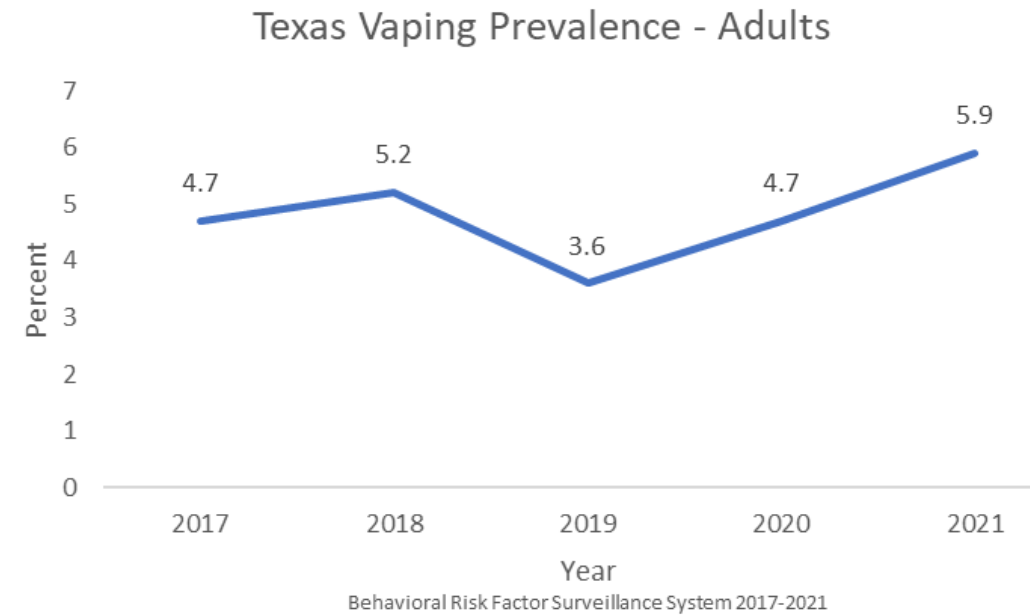

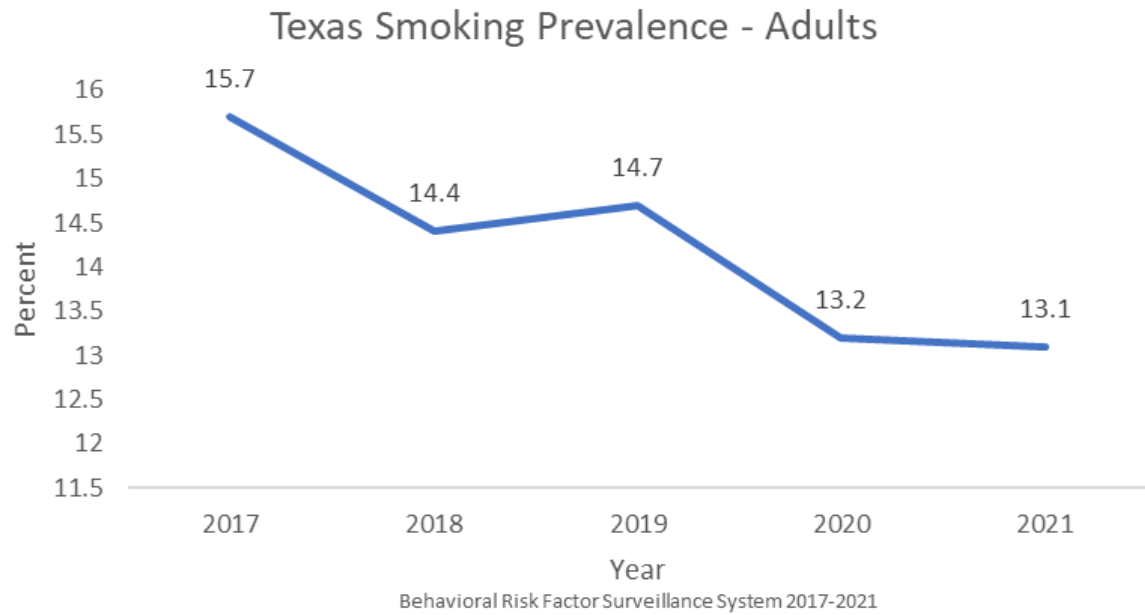

Vaping & Synthetic Nicotine

- Electronic Cigarettes
 - Vapes, e-cigarettes, ENDS (electronic nicotine delivery systems)
 - Operate by heating a liquid solution to produce an aerosol that is then inhaled
 - Nicotine levels vary
 - Nicotine salts
- Synthetic Nicotine/Non-Tobacco Nicotine
 - Marketed as “tobacco-free”, but still contain nicotine
 - Regulated by FDA (2022) the same as tobacco-derived nicotine products
 - To date, no approved products on the market
- Dual-use

Tobacco & Oral Health

- Tobacco causes oral cancer, gum disease, and other oral health problems.
- Increased risk of periodontitis, peri-implantitis, caries, alveolar osteitis, and halitosis
- Smokeless tobacco
 - Increased risks of oral cancer
 - Can cause leukoplakia inside the mouth
- Vaping
 - May contribute to gum disease, dental caries
 - Creates a unique oral microbiome

Adult Tobacco Use

Youth Tobacco Use

Youth Tobacco Use

Findings on Youth Use for All Tobacco Products

NYTS
2023

10% of students
reported current use of any tobacco product

Among those who currently use a tobacco product:

E-Cigarettes
were the most popular
product for the
10th year in a row

**Cigarette
and Cigar**

use remain at an all-time low

Youth Tobacco Use

Findings on Youth Use for E-Cigarette Products

NYTS
2023

More than **2.1 million**
youth currently use e-cigarettes,

with a decline in high school students currently using e-cigarettes in 2022-2023

Among youth who reported current use of e-cigarettes:

More than **1 in 4**

use e-cigarettes daily

The most popular brands include disposable and cartridge-based products, and the most commonly reported products were:

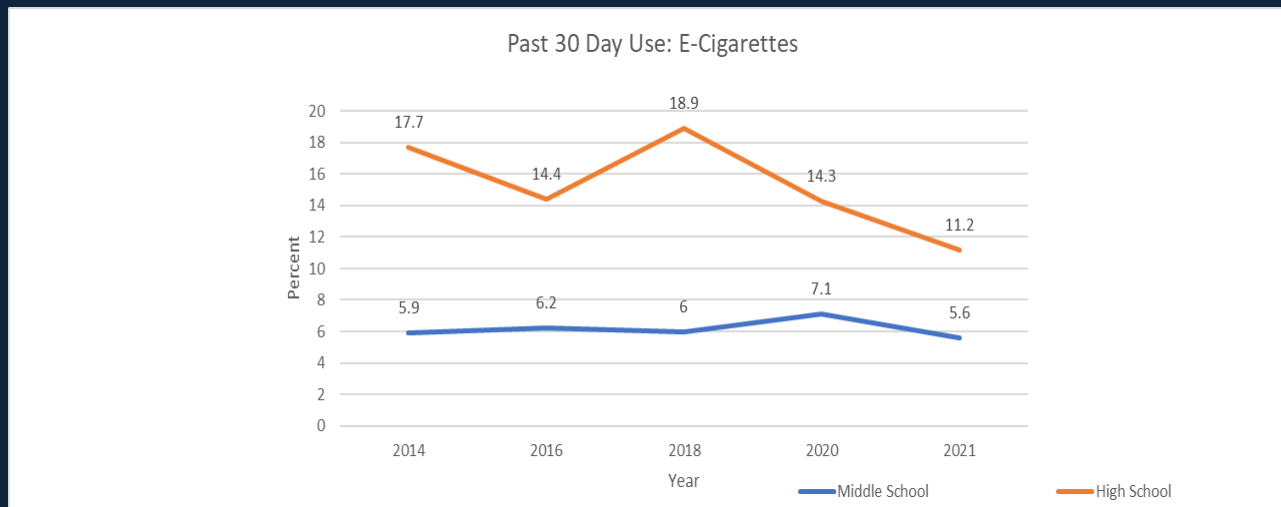

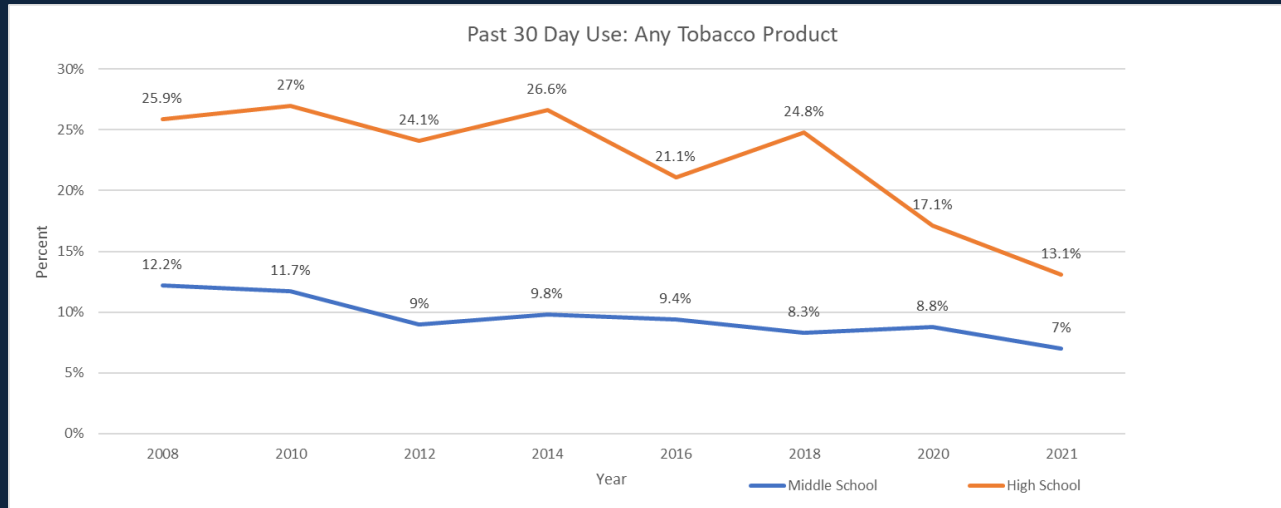

Almost
9 out of 10

use flavored e-cigarettes

Texas Youth Tobacco Use

Untreated Tooth Decay

Untreated tooth decay is higher in people who smoke cigarettes

Among adults aged 20–64 years, over 40% who **currently smoke cigarettes** had untreated tooth decay.

Untreated Tooth Decay in Older Adults

Older adults who smoke cigarettes are twice as likely to have untreated tooth decay as those who never smoked

About **1 in 3** adults aged 65 or older who smoke cigarettes have untreated tooth decay.

Tooth Loss

People who smoke are 3 times more likely to lose all of their teeth

4 in 10 older adults who currently smoke cigarettes **lost all of their teeth.**

Percentage of adults aged 65 or older who lost all of their teeth, 2011–2016

Why?

Cigarettes have over 7,000 chemicals, at least 69 of which are known to cause cancer.

Texas loses 28,000 people annually due to cigarette smoking.

Texas loses \$34 billion on healthcare costs and lost productivity attributed to tobacco use.

Tobacco use is the leading cause of preventable death and can cause cancer, heart disease, stroke, diabetes, and lung disease.

Tobacco: Impact on Chronic Health Conditions

- Type 2 Diabetes
- HIV
- Substance Use Disorders

Tobacco Myths

Myth #1
Occasional cigarette
smoking or tobacco
use/vaping isn't a
big deal.

BUSTED

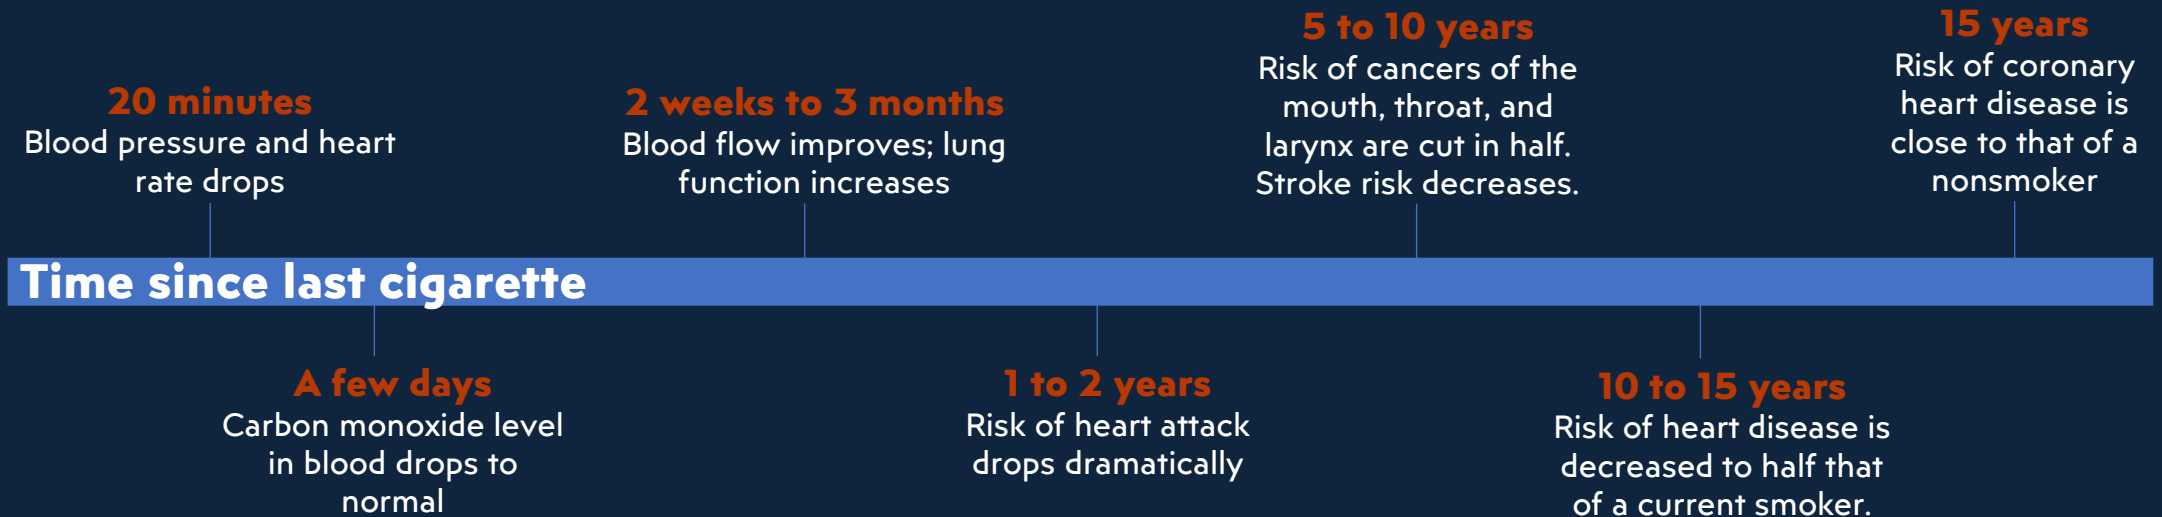

Myth #2
Vaping isn't as
harmful as
combustible
cigarettes.

BUSTED

Myth #3
It's too late to
quit—the
damage is
already done.

BUSTED

Smoking Cessation Benefits Over Time

Highlights: Clinical Practice Guideline *Treating Tobacco Use and Dependence: 2008 Update*

- Tobacco dependence is a chronic disease—often times requiring repeated intervention and quit attempts.
- It is essential for clinicians and healthcare delivery systems to consistently identify and document tobacco use status and treat every tobacco user seen in a healthcare setting.
- Individual, group and telephone counseling are effective.
- Counseling and medication are effective when used by themselves for treating tobacco dependence. However, the combination of counseling and medication is more effective than either alone.
- Telephone Quitline counseling is effective with diverse populations and has broad reach.

Why?

Nearly 70% of adults who smoke want to quit.

Over 50% of adults who smoke try to quit each year.

3 in 5 adults who ever smoked cigarettes have quit

Why?

- Patients are 66% more likely to successfully quit tobacco when healthcare providers actively intervene to connect them with FREE services.
- Behavioral counseling and cessation medication interventions can double a patient's chances of quitting, compared with self-help materials or no treatment.
- Healthcare systems aren't consistently collecting data or referring to the Quitline.
- More than 40% of smokers in healthcare settings are NOT receiving tobacco cessation counseling.

Mental Health Myths

Myth #1: Smokers and e-cigarette users with mental health conditions don't want to stop smoking/vaping.

Myth #2: Smokers and e-cigarette users with mental health conditions can't quit smoking/vaping.

Myth #3: Quitting smoking/vaping can make mental health condition symptoms worse.

Texas Quitline

- Free services
- Offered in English and Spanish
 - Additional languages through simultaneous interpretation
- Calls answered and counseling available 24/7
- Private & confidential service, HIPAA Compliant

Quitline Benefits

5 counseling sessions for patients 13+

Over-the-counter nicotine replacement therapy for qualified* patients 18+

- Gum, patches, or lozenges
- Mailed to the patient's home

Referrals can be made anytime; Enroll up to 2x/year

Texas Quitline

- Qualifications
 - Texas address
 - USA phone number
 - 13 years + for counseling
 - 18 years + for nicotine replacement therapy
 - Ready to quit within 30 days

- Quitline proactively calls patient within 48 hours of referral to set appointments

What Happens After the Referral?

- Call from the Quitline within 48 hours
 - Up to 5 attempts to reach patient
 - Several questions to tailor services to meet patients' needs
 - Quit Coach®
 - 5 telephone coaching sessions (13+)
 - Nicotine Replacement Therapy mailed to the home (18+)
- Quitline Reports
- Progress Notes in EMR (if using Direct Trust Messaging)

Top Barriers to Assessing for Tobacco Use

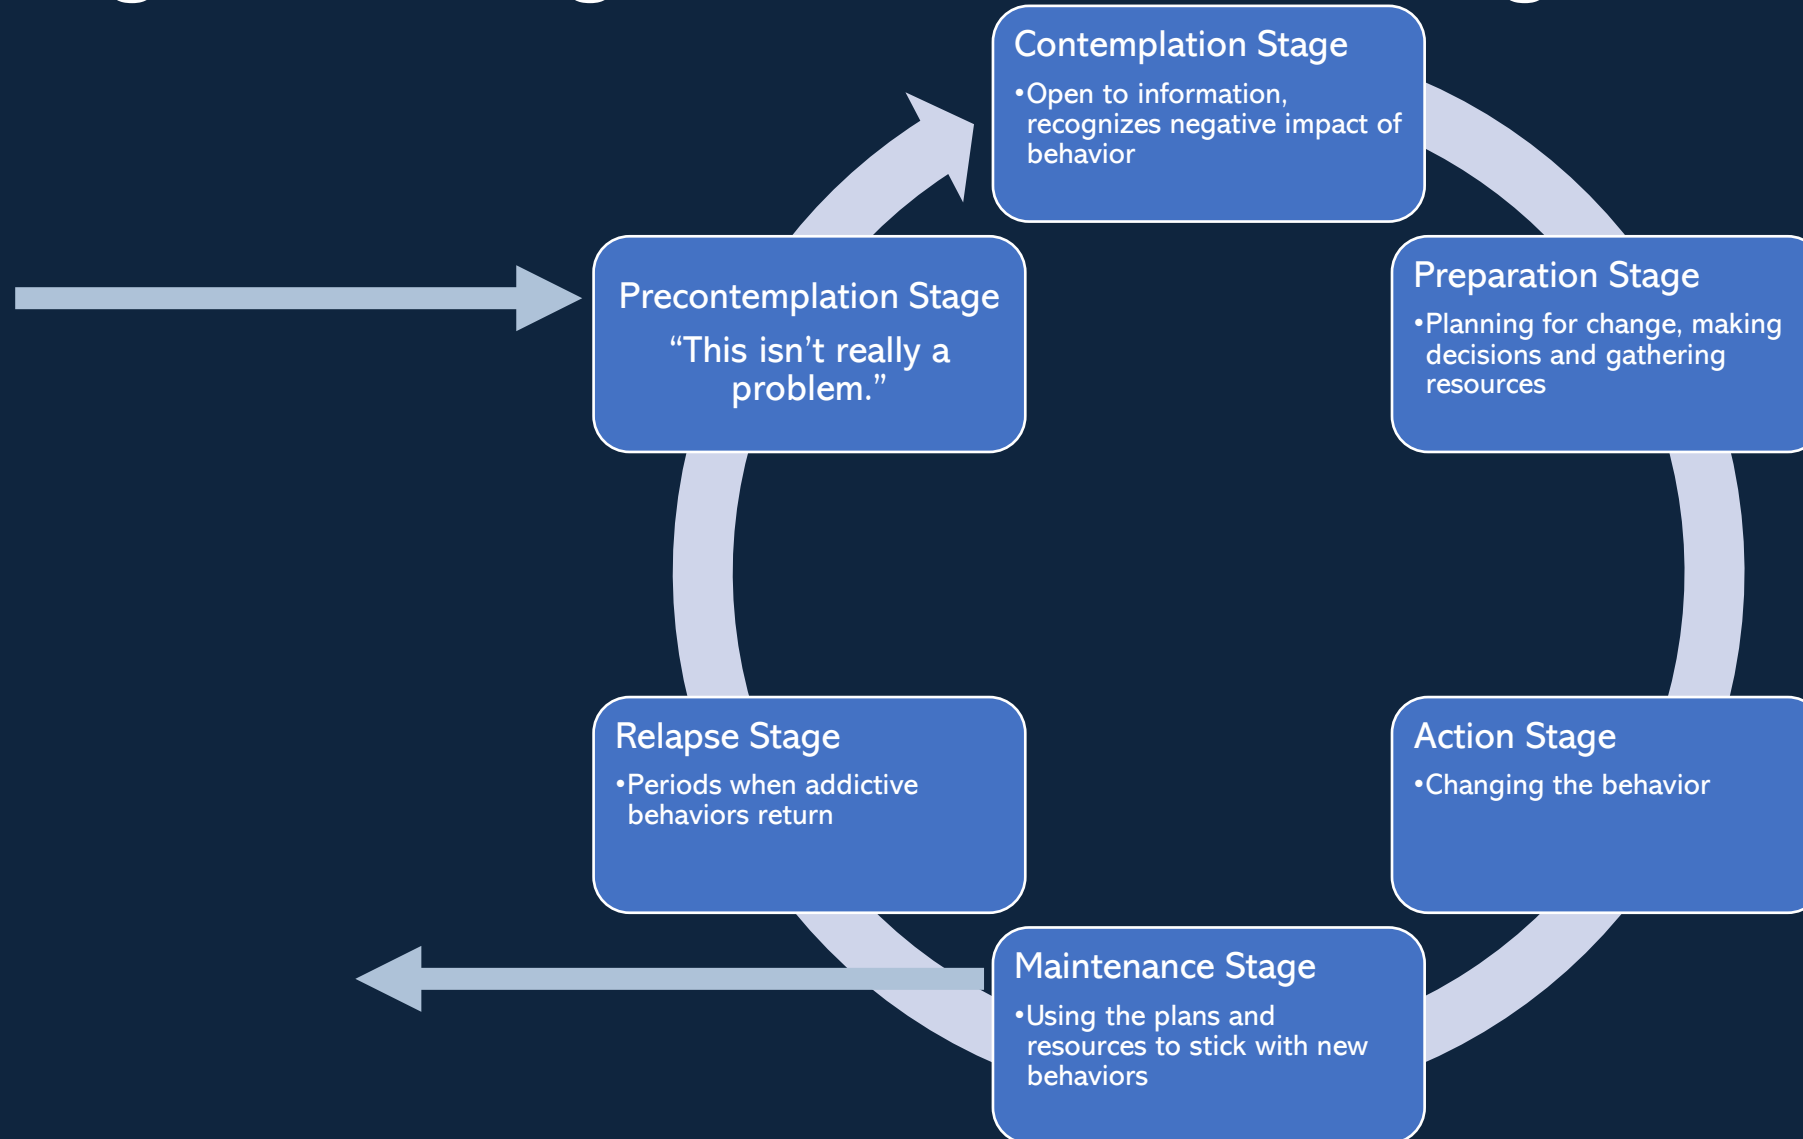

Lack of Training

Lack of Time

Stages of Change Model of Overcoming Addiction

Ask-Advise-Refer Workflow

Ask if the patient uses tobacco

Advise the patient to quit.

Refer patient to the Quitline..

Ask-Advise-Refer Workflow

ASK – if the patient uses tobacco

- Tobacco use screening of all patients 13 and older
- Tobacco use status is documented in EHR
- If the patient is a tobacco user, the clinical tobacco treatment workflow is activated*

Ask-Advise-Refer Workflow

ADVISE – the patient to quit.

- Assess the patient's readiness and motivations for quitting
- Assess the patient's barriers to quitting.
- Inform patient of resources available to support quit efforts, including Quitline and any local resources.
- Dose for FDA tobacco cessation medications when appropriate

Ask-Advise-Refer Workflow - ADVISE

Advice should be:

Clear

- “Occasional smoking is still dangerous and harmful for your health.”
- “There is no safe level of tobacco use.”

Strong

- “As your healthcare provider, I need you to know that quitting tobacco/vaping is the most important thing you can do to protect your health now and in the future. We’re here to help you.”
- “It’s important for you to quit using tobacco/vaping now, and I’m here to support you.”

Personalized

- “Continuing to use tobacco/vape makes your asthma worse, and quitting may dramatically improve your health.”
- “Quitting smoking may reduce the number of ear infections your child has.”

Preparing For Barriers

- Nicotine Withdrawal
 - Cravings
 - Irritability
 - Difficulty sleeping
 - Difficulty concentrating
 - Restlessness
 - Sadness, anxiousness, or Depression
 - Hungry

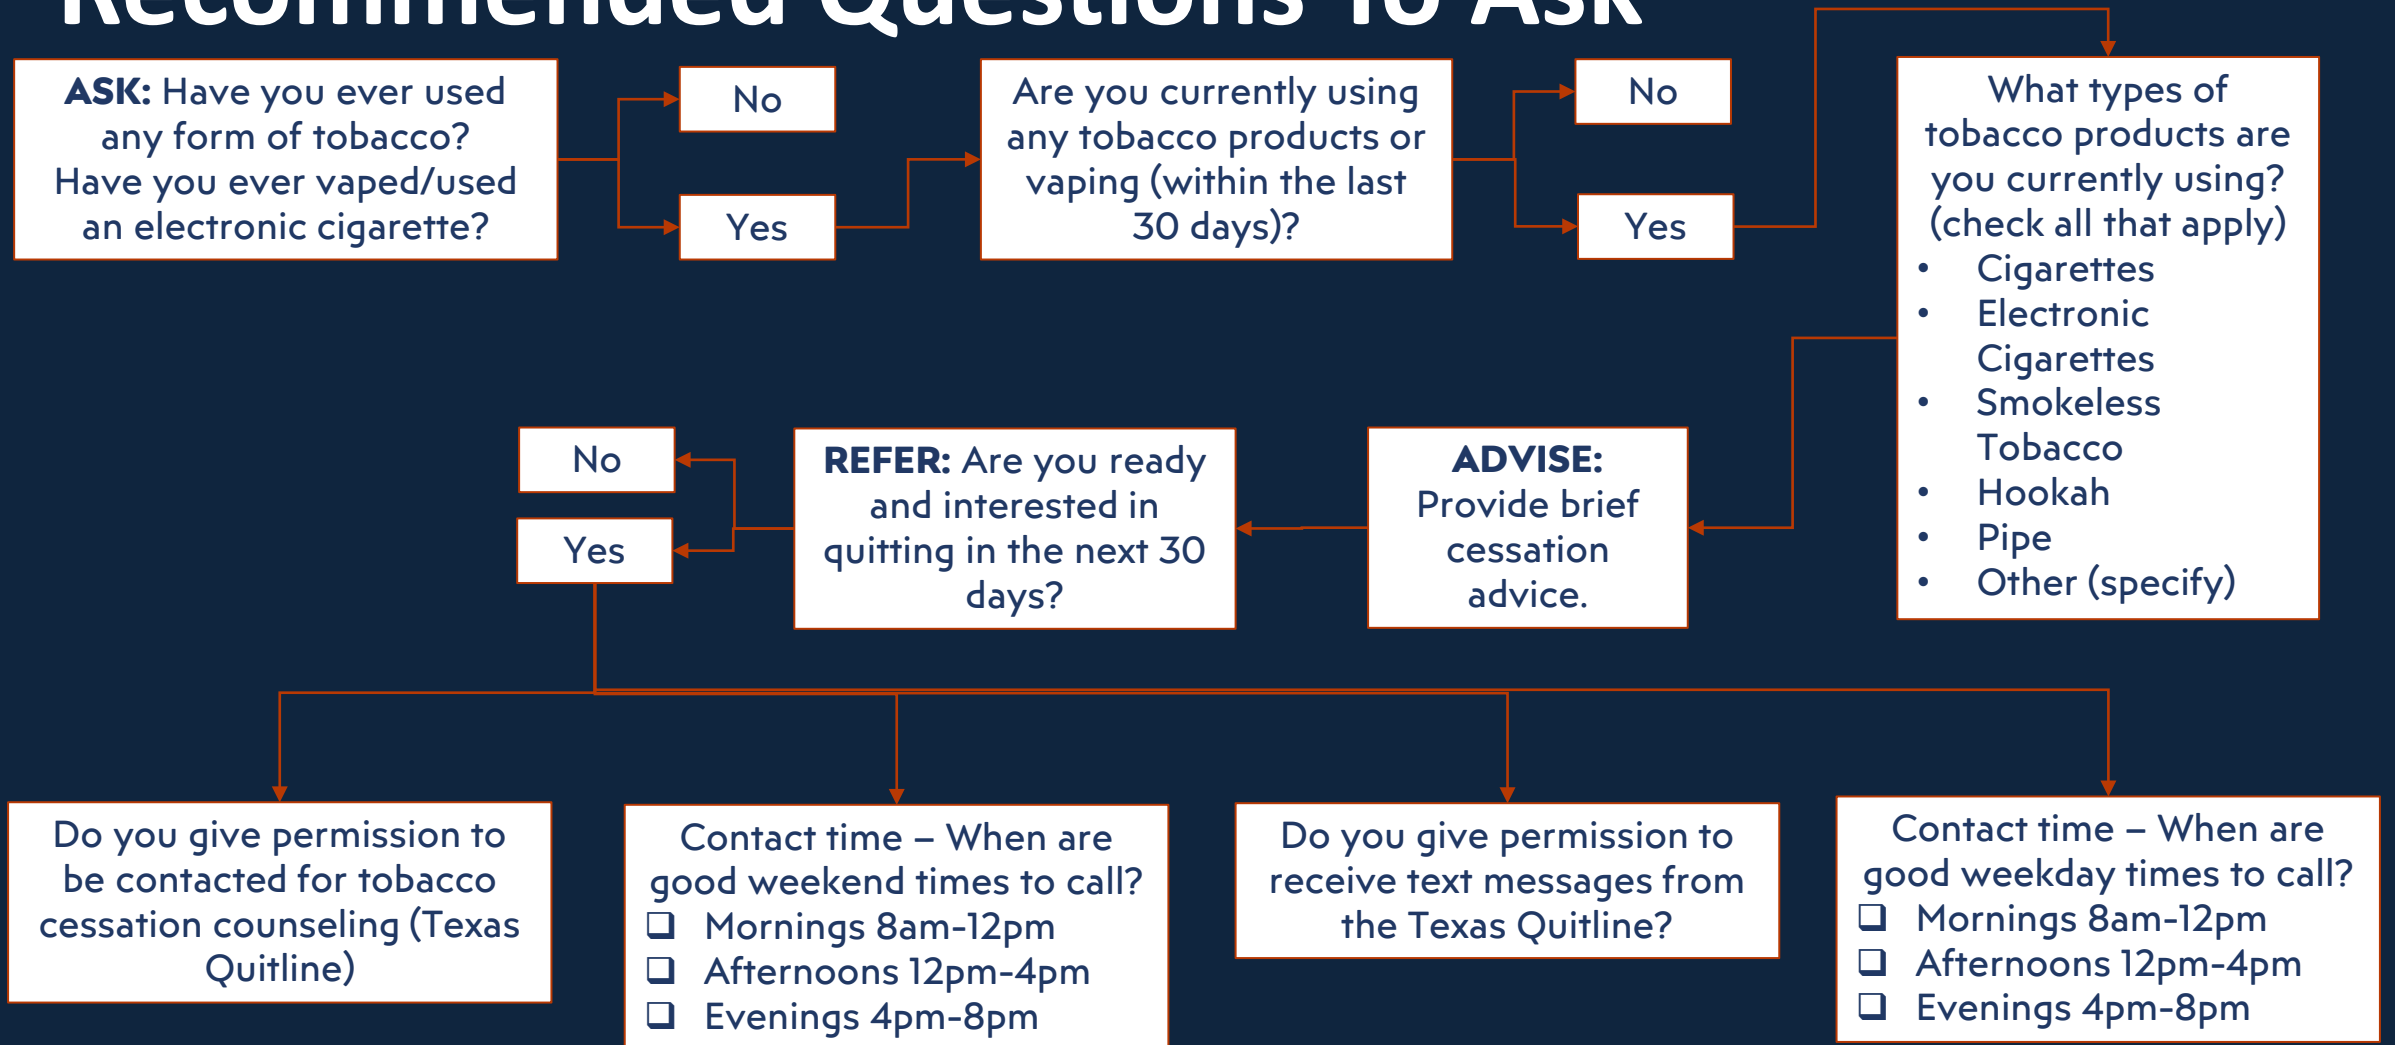

Ask-Advise-Refer Workflow

REFER – to the Quitline.

- Proactive referral for patients ready to quit within 30 days.
- Provide patient with any written materials to encourage or support
- Healthcare systems can receive patient progress notes

Recommended Questions To Ask

Texas Quitline Referral Methods

- Paper-based fax referral
 - YesQuit.org
- eTobacco Protocol
 - Through EMR/EHR
- App referral
 - Texas Quitline

eTobacco Protocol

Goal: Seamless link between assessing for tobacco use, identifying patients interested in quitting in the next 30 days, and access to Quit resources.

- Identify electronic health record (EHR)/electronic medical record (EMR) platform
- Technical support
- Training
- Implementation
- Follow-up

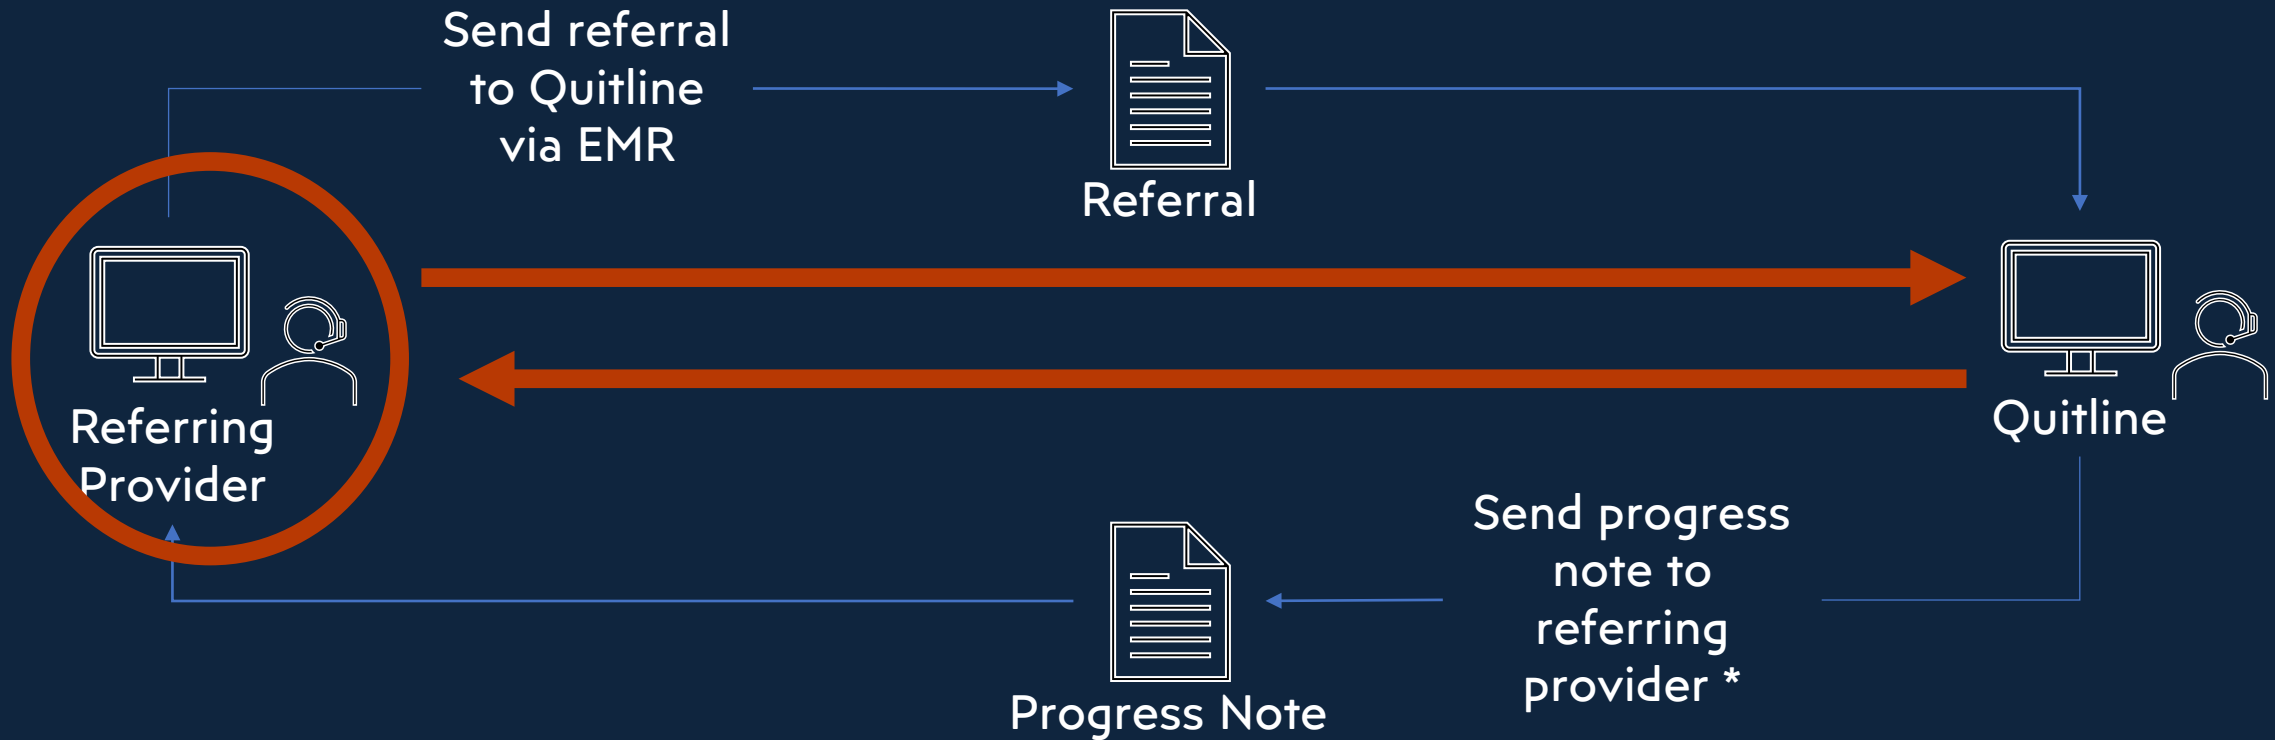

eTobacco Protocol

- Benefits:
 - Efficient counseling and referral option
 - Quitline proactively connects with patients
 - Feedback to EHR (bidirectional Transmission)
 - HIPAA Compliant
 - Technical assistance
 - Systemwide Public Health impact
 - Revenue: Meet Tobacco Cessation Quality Control Measures
 - Eradicate the #1 cause of preventable death
 - Protect adults and children

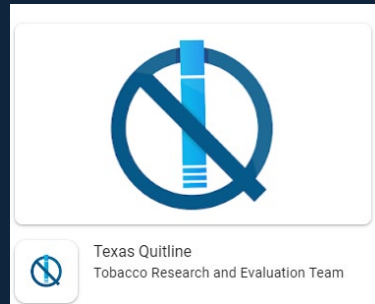

eTobacco Protocol

Texas Quitline App

- Available - free
- Available on both Android and Apple platforms
- Easy to use for Community Health Workers and mobile staff
- Nice alternative if the eTobacco protocol is not available
- HIPAA-compliant

Advise

Advise

Referral Model Overview:

1. **ASK** people if they use tobacco and whether they want to try to quit within 30 days.
2. If yes, **ADVISE** them to quit and educate them on treatment options.
3. **REFER** them to the free Quitline service, explaining the benefits and success rate of doing so when coupled with Nicotine Replacement Therapy or prescription medication.

💡 Tip: Utilize [motivational interviewing skills](#) during Step 1: ASK

Ask

Advise

Refer

Aconsejar

Panorama general del modelo de referencias

1. **PREGUNTE**a los pacientes si usan tabaco y si desean dejar de hacerlo en un lapso de 30 días.
2. Si la respuesta es sí, **ACONSEJE** a los pacientes que dejen de usar tabaco e infórmeles las opciones de tratamiento.
3. **REFIERA**a los pacientes al servicio gratuito Quitline, y explíqueles los beneficios y la tasa de éxito cuando lo hacen junto con terapia de sustitución de nicotina o medicamentos con receta.

Referral Documentation

The screenshot shows a mobile application interface for the Tobacco Research & Evaluation Team. At the top, there is a logo with a person and a cigarette, followed by the text "TOBACCO RESEARCH & EVALUATION TEAM". To the right are language selection buttons for "Eng" and "Esp". Below this is a navigation bar with two buttons: "Submit New" and "Past Referrals". The main content area displays a referral record for the date "12/06/2022" at "9:37am". The record includes the following details:

Referral DOB	12 / 06 / 1973
Referrer Name	Ashley LeMaistre
Clinic	Tobacco Research & Evaluation
Phone	(512) 232-9307
Fax	Unknown
Zip Code	78712
HIPAA Covered?	No

At the bottom of the screen is a navigation bar with four icons: "Referrals" (a person with a plus sign), "Resources" (an open book), "Videos" (a play button), and "Advise" (a lightbulb).

Technical Assistance

Exploration & Training

- Host informational conference call with decision makers
- Workflow planning
- Training for healthcare professionals and Community Health Workers
- Continued maintenance support after integration

Quitline Referral

- Technical support to assist with implementing the electronic tobacco referral through the EMR
- \$4000 mini grant opportunities during testing phase*
- Share monthly report for referrals made from Quitline

Patient Material

- Handout for patients on what to expect after a referral is made
- Various tobacco prevention handouts

Billing/Coding for Tobacco Cessation and Counseling

- Covered by Medicare, Medicaid, and most private health plans

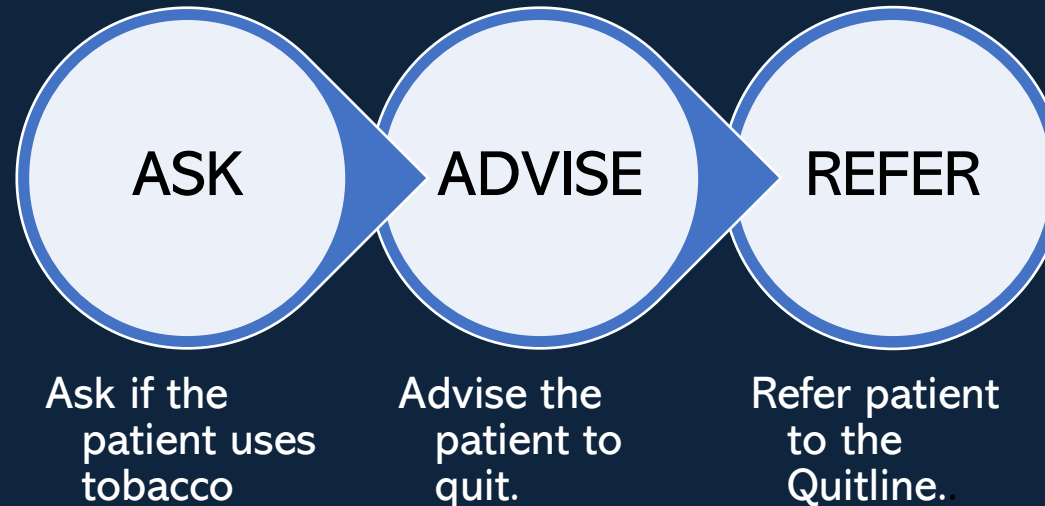

What is Covered?

Patients and providers should check with individual Medicaid, MCO and private insurance plans to determine what specific treatments are included and the extent to which these treatments are covered. Questions to ask payers would include:

1. Are both individual and group counseling covered?
2. Are there limits on the number of counseling sessions (either individual or group)?
3. Are there any restrictions on what provider types may bill for counseling? (MD, NP, PA, etc.)
4. Are there specific notes that must be included in documentation for counseling?
5. Is there coverage for nicotine replacement therapy (patch, gum, inhaler)?
Can it be over the counter or must it be prescription to be covered?
6. Is there coverage for bupropion? Is there coverage for varenicline?
7. Are there any prior authorization or step therapy requirements?
8. How many fills are allowed per patient per year?
9. What should my patient expect in terms of cost sharing?

Highlights

- Document **every** patients' tobacco use status
- Counseling and medication, when **combined**, are **more** effective and give patients the **best** chance of quitting and **staying** quit.
- Texas Quitline is free and offers 5 free counseling sessions (13+) and free nicotine replacement therapy (18+)

- Referrals can be sent via: Fax, eTobacco protocol through EMR, Texas Quitline app
